

# Centenary College Equestrian Center

*Outside Ring at the Equestrian Center*

We completed our new USET arena in 2000. Our Equestrian Center incorporates the latest features in arena design available today. It is a heated, bright 220' x 100' riding space with:

- Misting system
- Quality sound system
- State-of-the-art jumps
- All-weather sand, rubber, and Euro-felt footing from Footings Unlimited
- Judge's booth and viewing stands
- Viewing from classrooms and lounge

The facility also includes a second indoor arena, 196' x 86', used for additional lessons and schooling. We also have a lighted outdoor arena, 240' x 125', with all-weather footing, as well as a multi-acre outdoor hunt course.

To house our horses, the Equestrian Center has two barns with large box stalls, wide aisles and fully equipped grooming stations. The main barn is heated. Both barns are maintained by a special team of barn staff, and there is also a third barn designated for students who may wish to bring their own horses.
